RE: Outstanding account balance — five invoices past due

Dear Ms. Walker,

I am writing on behalf of the Accounts Receivable office at Anomalous Materials Laboratory regarding the current status of Lambda Precision Engineering's account (No. LPE-4471). Our records indicate that **five invoices, totalling \$76,285.00**, remain unpaid beyond their agreed net-30 terms. These relate to precision components and calibration services supplied to your Auburn Hills facility between November 2025 and May 2026, itemised below for your reference:

INVOICE NO.	DATE	DESCRIPTION	AMOUNT	DAYS PAST DUE
INV-2025-1187	14 Nov 2025	Anti-mass spectrometer calibration set	\$18,450.00	222
INV-2025-1204	02 Dec 2025	HEV composite plating, Mk IV (12 units)	\$27,300.00	204
INV-2026-0056	19 Jan 2026	Specimen containment vessels (Series G)	\$9,875.00	156
INV-2026-0231	27 Mar 2026	Cascade resonance dampers (matched pair)	\$14,120.00	89
INV-2026-0388	22 May 2026	Retinal-scan access controllers (8 units)	\$6,540.00	33
TOTAL OUTSTANDING			\$76,285.00	

As several of these balances are now significantly past due, we would be grateful if you could arrange settlement of the full amount within **14 days** of the date of this letter. Payment may be made by ACH transfer or by check payable to *Anomalous Materials Laboratory*, quoting reference AR-2026-0417 to ensure it is applied correctly.

If any of these invoices are disputed, or if payment has already been remitted, please contact our office so that we may reconcile our records. We value our working relationship with Lambda Precision Engineering and would much prefer to resolve this matter directly, before placing a hold on future orders or referring the account for further action.

Thank you for your prompt attention. Please do not hesitate to contact me on the direct line below with any questions.

Yours sincerely,

Eleanor Cross
