**Subject: Bid for the tender "Procurement of document scanners" – Your
reference number: ADV-2025-042**

Dear Ms. Schmidt,

We have taken note of your tender (Ref. ADV-2025-042) for the procurement of document scanners with great interest. On behalf of Müller & Partner Innovations GmbH, I would like to thank you for the opportunity to submit a bid.

As a leading provider of digitization solutions in the public sector, we understand the challenges facing the Office for Digital Administration. The widespread introduction of e-files and the associated need to digitize existing paper archives efficiently, legally compliantly, and in high quality forms the foundation for modern, citizen-oriented administration.

We are convinced that our holistic approach—consisting of powerful hardware, intelligent software, and a comprehensive service concept—makes us the ideal partner for you to successfully implement this important project.

1. Our solution portfolio: Tailored to your requirements

We have analyzed your requirements in detail and put together a solution package that is tailored to both mass digitization (incoming mail, archives) and decentralized capture at workstations.

Our offer is based on two core components:

1.1. For high-performance incoming mail: MCP ScanPro A3-80

For the centralized capture of large volumes of documents, such as those typically found in incoming mail or archive digitization, we offer our flagship model, the **MGP ScanPro A3-80**.

This device is designed for continuous operation and processes a wide variety of document types—from thin carbon paper to bound documents or passports (with optional flatbed)—with outstanding speed and image quality. The integrated ultrasonic double feed detection and intelligent

paper feed (i-PZS) guarantee smooth operation, even with mixed documents.

1.2. For the decentralized workplace: MCP ScanFlow A4-60

Digitization "at the source," i.e., directly at the employee's workplace, is a key lever for efficiency. We recommend the **MGP ScanFlow A4-60** for this purpose.

This compact but powerful A4 scanner fits on any desk and impresses with its ease of use ("one-touch scanning"). Employees can scan documents directly into the correct process or workflow without having to leave their workplace. Despite its small size, it offers professional features such as duplex scanning in a single pass, automatic color detection, and reliable document processing.

2. Technical specifications at a glance

The following table compares the technical performance data of the models offered:

Feature	MGP ScanPro A3-80 (high-volume)	MGP ScanFlow A4-60 (Workstation)
Scanning speed	Up to 80 pages/min. (160 images/min.) Duplex	Up to 60 pages/min. (120 images/min.) Duplex
Optical resolution	600 dpi (output 150 - 1200 dpi)	600 dpi (output 150 - 600 dpi)
Automatic document feeder (ADF)	300 sheets (A4, 80 g/m ²)	80 sheets (A4, 80 g/m ²)
Max. document size	A3 (up to 305 x 432 mm)	A4 (up to 216 x 356 mm)
Long paper (banner)	Up to 5,588 mm	Up to 5,588 mm
Paper thickness	20 - 413 g/m	27 - 413 g/m
Recommended daily volume	Up to 40,000 pages	Up to 7,500 pages
Interfaces	USB 3.1 Gen1, Gigabit Ethernet (RJ-45)	USB 3.1 Gen1, optional WLAN/Ethernet
Driver compatibility	TWAIN, ISIS, WIA; SANE (Linux)	TWAIN, ISIS, WIA
Special features	Ultrasonic double feed detection, i-PZS paper feed, active feed rollers	Ultrasonic double feed detection, intelligent document separation

3. Intelligent capture: MGP CaptureSuite software

Hardware is only half the battle. The real added value comes from intelligent software that controls, optimizes, and automates the digitization process. All our scanners come with **MGP CaptureSuite Pro**.

[Screenshot of the MCP ScanSuite software interface]

This software offers much more than just scanning control. Its range of functions is specially tailored to the requirements of public administrations:

- **Perfect images:** Automatic skew correction (deskew), removal of blank pages, automatic rotation, color/black-and-white detection, removal of punch holes and stains.
- **Intelligent OCR:** High-precision text recognition (OCR) for all common languages, generating searchable PDFs (PDF/A-2b compliant) or editable formats (Word, Excel).
- **Automated classification:** The software can automatically recognize documents based on their layout or content (e.g., "invoice," "application," "notification") and sort them accordingly.
- **Barcode and patch code recognition:** Fully automatic separation of document stacks using barcode or patch code sheets.
- **Metadata extraction:** Automatic reading of key information (e.g., invoice number, date, applicant) and transfer to your DMS.
- **Seamless integration:** Standardized interfaces (CMIS, XML, defined directories) to all leading e-file and DMS systems (e.g., Fabasoft eGov-Suite, OpenText, Ceyoniq nscale) are guaranteed.

4. Implementation, training, and project management

A successful rollout goes beyond simply delivering devices. We offer you a structured approach to implementation and commissioning:

1. **Workshop (kick-off):** Joint definition of scan profiles, workflows, and naming conventions with your key users and IT department.
2. **Technical setup:** Installation and configuration of devices (network connection, driver distribution, setup of scan targets) by our certified technicians.
3. **User training:**

- **Admin training:** Instruction of your IT administrators in the management of the devices and the capture software.
 - **Key user training:** Detailed training for main users (e.g., mailroom) in using the software and troubleshooting simple problems.
 - **Employee training:** Brief, concise training for clerks on how to use the decentralized workplace scanners.
4. **Go-Live G Support:** Support during the first days of operation by one of our technicians on site (floorwalking) to clarify any questions that may arise.

5. Service and support concept (SLA)

The operational reliability of your scanning infrastructure is our top priority. Our offer includes a standard 3-year "Premium On-Site" service package.

Service level	MGP Premium On-Site (included)
Validity	36 months from delivery
Service hotline	Weekdays (Mon-Fri), 8:00 a.m. - 6:00 p.m.
Language	German (native speakers, no call center)
Response time (phone)	Guaranteed < 30 minutes
Response time (on-site)	Next business day (NBD)
Spare parts stocking	Central warehouse in Frankfurt am Main
Scope of services	Includes all labor, travel, and spare parts costs
Replacement service	If repair is not possible, a replacement device will be provided

This service level can be optionally extended to 5 years or upgraded to a 4-hour on-site service (on working days).

6. Price overview

A detailed, legally binding price list in accordance with the specifications of your tender can be found in **Appendix 1: Price list**. The following table provides an indicative overview (all prices are net plus VAT).

Item	Description	Quantity	Unit price	Total price
1.1	MGP ScanPro A3-80 (Includes CaptureSuite Pro, 3 years NBD)	5	€7,850	\$39,250.00
1.2	MGP ScanFlow A4-60 (incl. CaptureSuite Pro, 3 years NBD)	40	€1,120.00	€44,800.00
2.	Optional: A3 flatbed unit (for ScanPro A3-80)	2	1,400.00	€2,800.00
3	Service package (kick-off, installation, configuration, admin training)	1	€4,500	€4,500.00
3.2	User training (group of 10 people, 4 hours)	4	€850.00	€3,400.00
Total (net)				€4,750.00

7. Why Müller G Partner Innovations GmbH?

- **Experience in the public sector:** We have been a framework agreement partner of various state and federal authorities for over 15 years and are very familiar with the specific requirements (GDPR, BSI basic protection, e-invoicing).
- **Holistic approach:** We provide hardware, software, implementation, and service from a single source—with dedicated contact persons.
- **Manufacturer independence G Expertise:** As a system house, we bundle the best technologies on the market and integrate them into a seamless solution for our customers.
- **Sustainability:** We focus on durable products and low energy consumption, and offer certified disposal processes for old devices.

Dear Ms. Schmidt, we are confident that our offer not only meets but exceeds the requirements of the Office for Digital Administration. We are investing in a long-term partnership, not a short-term sale.

We are available at any time for a personal presentation of the devices at your premises or to answer any questions you may have.

Sincerely, [Placeholder for
